MELON SEED Grown
Than We Have.

NEW IMPROVED TOM WATSON WATER-MELON SEED

Our NEW IMPROVED TOM WATSON MELON SEED WAS IN SUCH DEMAND LAST SEASON that we could not fill all the orders we received and we advise you to place your order at once. We have about 8,000 lbs. this year to offer of the two kinds, the Coffee Colored Seed and the Ivory White Seed.

These seeds have been produced after countless experiments, breeding and cross breeding the TOM WATSON with the SOUTH AMERICAN CHILJEAN MELON, with the firm rind of the CHILJEAN MELON, making a first class shipper which will hold up well, combining with and retaining the sweetness and other wonderful qualities of the present TOM WATSON MELON.

The **IVORY WHITE SEED** melon matures two weeks ahead of the **COFFEE COLOR SEED** MELON. The white seeded melons will be perfect, free from necks, very sweet, excellent shippers and the seeds will be large **IVORY WHITE** and fine shape.

The **COFFEE COLOR SEED** improved TOM WATSON is, without doubt, the finest seed ever offered melon growers and will produce melons of unequalled quality and size.

We have been to great expense in perfecting these two new types of seeds, but our prices will be reasonable. In order that you may see and judge of the fine quality of these new improved seeds, we will gladly send you a small sample **FREE OF CHARGE** upon request. After you have received the sample, compared and noted the difference in its color, size and shape with other seeds, send us your order today.

WE GUARANTEE THE SEED TO BE AS REPRESENTED and will refund your money if not entirely satisfactory. **GET YOUR ORDER IN EARLY.**

While this corn is not a true sweet corn, you can hardly tell the difference. It is far ahead of the Early Adams varieties. The ears are from 8 to 10 inches long and have two to three ears to the stalk. The picture here shown is a true photograph of an ideal ear of this GRAND NEW CORN. To my many Customers and Friends

During this coming season, 1922, I am going to organize a partnership organization, for the manufacturing of fruits and vegetable products, carbonated waters, etc.

We expect to put up tomatoes, apples, sweet potatoes, cat-sup, etc., pickles, kraut, all kinds of carbonated waters for soda fountains and such things, that go along with this kind of a plant.

I propose to organize this company so that all members will be able to get the products that we put up at about cost, and in order to boost our enterprise he can solicit business from his neighbors, and in this manner it will create a demand for our products and will make money for the organization, to which you belong, and in which you will share the profits at the end of each season.

The officers of this organization are to be selected from those subscribing for membership, and no one member shall be allowed the controlling interest therein.

The shares in this organization shall be of par value of \$1.00 each, and anyone may subscribe for the amount agreed on by the board of managers, or officers of the company, who will notify each signer what has been allotted to him. He can then remit to the treasurer for his interests in the business.

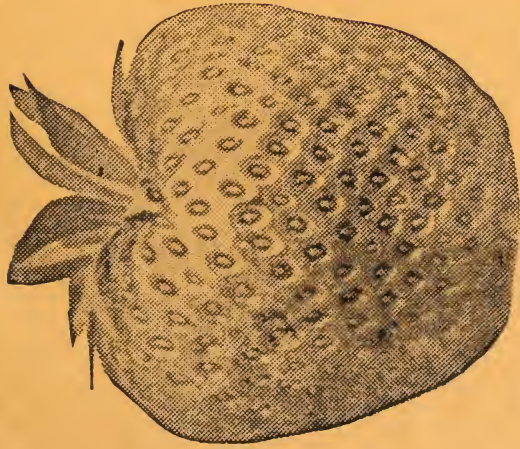

It is my purpose to get this plant ready for operation this coming season, and I would like to have you write me if you will be interested and give your ideas about such a plan and from all that do reply we can get a good and valuable plan for operation.

Let me hear from you on the reverse side of this sheet.

Yours respectfully,

GENE HAYES.
